DETAILED ACTION

Specification

1. The specification has not been checked to the extent necessary to determine the presence of all possible minor errors. Applicant's cooperation is requested in correcting any errors of which applicant may become aware in the specification.

Claim Rejections - 35 USC § 112

2. The following is a quotation of the second paragraph of 35 U.S.C. 112:

The specification shall conclude with one or more claims particularly pointing out and distinctly claiming the subject matter which the applicant regards as his invention.

3. Claims 3, 11-14 and 16 are rejected under 35 U.S.C. 112, second paragraph, as being indefinite for failing to particularly point out and distinctly claim the subject matter which applicant regards as the invention.

Claim 3 is rejected because [(R³+R⁴+R⁵)/R²1 is not understood.

Claims 11 and 12 are rejected because the language an effective amount is indefinite.

Claim 14 is rejected because the language "the use as claimed" is indefinite.

Also, the language "is one obtainable by" is not positive claim language.

Claim Rejections - 35 USC § 102

4. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless -

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

Art Unit: 1797

5. Claims 1, 2, 4, 6-12 and 15 are rejected under 35 U.S.C. 102(b) as being anticipated by Balash (US 3,485,603).

Balash teaches a gasoline composition comprising the combination of an amine salt of a formaldehyde-modified unsaturated organic acid and an organic silicon compound. Examples of the silicon compound include polyhydrocarbylsiloxanes (silicones)(see abstract).

The silicones have a formula as follows

Wherein L is C_1 - C_{12} alkyl, C_6 - C_{10} aryl and n is an integer from 1 to about 20, L_1 is selected from L (see col. 2, lines 18-30). The compound of instant claim 2 is rendered obvious when y and z are 0. The acids that are neutralized contain from about 10 up to about 20 carbon atoms (see col. 3, lines 49-73). A concentrate of the additives contain the ratio of amine salt to organic silicon of from 60-95 % amine salt and from about 5-40 % organic silicon compound, or up to 200 ppm salt and up to 100 ppm silicon compound in the fuel, Balash teaches the addition of conventional additives (see col. 7, lines 47-58; col. 6, lines 1-13; claim 1). Since Balash teaches the same additive as that of the claims, Balash would inherently meet the limitations of claims 8-10.

Accordingly, Balash teaching all the limitations of the claims anticipates the claims.

6. Claims 5, 17 and 18 objected to as being dependent upon a rejected base claim, but would be allowable if rewritten in independent form including all of the limitations of

Art Unit: 1797

the base claim and any intervening claims. The prior art fails to teach or suggest the salt and the fuels in combination with the siloxane.

Any inquiry concerning this communication or earlier communications from the examiner should be directed to Cephia D. Toomer whose telephone number is 571-272-1126. The examiner can normally be reached on Monday-Thursday.

If attempts to reach the examiner by telephone are unsuccessful, the examiner's supervisor, Glenn Caldarola can be reached on 571-272-1444. The fax phone number for the organization where this application or proceeding is assigned is 571-273-8300.

Information regarding the status of an application may be obtained from the Patent Application Information Retrieval (PAIR) system. Status information for published applications may be obtained from either Private PAIR or Public PAIR. Status information for unpublished applications is available through Private PAIR only. For more information about the PAIR system, see http://pair-direct.uspto.gov. Should you have questions on access to the Private PAIR system, contact the Electronic Business Center (EBC) at 866-217-9197 (toll-free). If you would like assistance from a USPTO Customer Service Representative or access to the automated information system, call 800-786-9199 (IN USA OR CANADA) or 571-272-1000.
